SUMMARY

Product-minded data analyst supporting Hyundai Motor America, with experience building data products and decision-making solutions across automotive, pharmaceuticals, and civic technology. I translate ambiguous user and business needs into clear requirements, align cross-functional teams, and apply data and AI to deliver measurable outcomes.

EDUCATION

Viterbi School of Engineering, University of Southern California, Los Angeles, USA **August 2023 – May 2025**
Master of Science in Computer Science **GPA - 3.68/4.00**

Fr. Conceicao Rodrigues College of Engineering (Fr. CRCE), University of Mumbai, India **August 2019 – May 2023**
Bachelor of Technology in Computer Engineering **GPA - 3.9/4.00**

CERTIFICATIONS

Certified Associate in Project Management (CAPM) by PMI **September 2024**

WORK EXPERIENCE

Quantum5.ai (Onsite at Hyundai Motor America HQ) | Data Analyst | Fountain Valley, CA **August 2025 – Present**

- Own requirements and delivery for analytics and workflow improvements across Hyundai training and dealer programs, translating business needs into data definitions, KPI logic, validation rules, and clear engineering handoffs.
- Redesigned Hyundai's Brand Ambassador reporting process, replacing a seven-step manual handoff with an automated workflow that improved reporting accuracy, consistency, and turnaround time.
- Analyzed Hyundai's 2025 Employee Engagement Survey using correlation, regression, and qualitative theme analysis; presented findings and executive recommendations on training, retention, and dealer support.
- Built self-service dashboards and a Python measurement framework integrating training, certification, attendance, dealer-performance, and retail-sales data, enabling leaders to identify participation gaps and evaluate program effectiveness.
- Led requirements definition and QA for a dealer-employee termination survey feed, aligning Hyundai, engineering, and an external vendor on eligibility logic; identified 219 active employees who were incorrectly targeted and drove corrections before survey outreach.
- Defined privacy and data requirements for an AI-enabled new-hire chat initiative, documenting user inputs, AI-generated summaries and classifications, metadata, data flows, and business use cases to support Hyundai's privacy-review process.

Cipla USA Inc. | Data Analytics Intern (Remote) | New Jersey, USA **May 2024 – May 2025**

- Defined KPIs with Finance and Supply Chain and delivered an automated Power BI solution tracking $4M+ in product returns, giving stakeholders faster, more reliable visibility into operational performance.
- Led requirements, data mapping, stakeholder alignment, and validation for a SuccessFactors-to-ADP integration, ensuring accurate workforce data across HR and payroll workflows.
- Built predictive workforce dashboards using attrition, demographic, and time-tracking patterns to forecast hiring and retention risks, reducing recurring manual reporting effort by 40% and helping HR anticipate seasonal workforce needs.
- Helped launch a B2B self-service portal consolidating invoices, account information, and chat support for pharmacy customers, reducing reliance on fragmented platforms and email threads.
- Developed batch and real-time data pipelines across SAP, SFTP, Azure Data Lake, and EDW systems, automating data availability and improving consistency for downstream analytics.

SIMDAA Technologies Pvt. Ltd | Data Science Intern | Maharashtra, India **June 2022 – August 2022**

- Analyzed insurance-claim delays using SQL and Python, identifying workflow bottlenecks and opportunities to improve SLA adherence.
- Built Power BI dashboards for weekly triage reviews, enabling teams to monitor claim bottlenecks and contributing to a 25% reduction in resolution time.
- Partnered with business stakeholders to define hypotheses and success metrics, test workflow interventions, and translate results into process improvements.

DEREST MARKETING | Digital Marketing Intern | Gujarat, India **April 2021 – June 2021**

- Analyzed Instagram campaign performance to identify audience and content patterns, refining posting strategy and increasing reach and engagement by 30%.
- Designed and evaluated A/B tests across content formats, captions, and posting times, using results to improve follower conversion and retention.

Holy Family Church | Data Analytics Intern | Mumbai, India **October 2020 – January 2021**

- Built a Node.js and MongoDB job-application platform that connected COVID-affected job seekers with employment opportunities, improving access for underserved users.
- Designed data-driven matching logic to recommend relevant openings to applicants, increasing successful job placements by 25%.

ACADEMIC PROJECTS

Assessing the California Public Sector Job Market **September 2023 – August 2025**

- Defined the scope, requirements, and roadmap for a statewide workforce-transparency initiative, translating an ambiguous public-sector problem into an actionable cross-functional project.
- Built Python ETL workflows to validate and integrate fragmented government job data into a reusable, analysis-ready system.
- Developed Tableau dashboards analyzing 2,500+ job listings to surface hiring trends, high-demand roles, and underserved geographies for policy and academic stakeholders.
- Coordinated across policy, data science, and engineering teams and secured funding from the Volcker Alliance, expanding the initiative's reach.

Real-Time Stock Search Application **January 2024 – May 2024**

- Developed a real-time stock-tracking product and migrated the initial Flask prototype to a MERN architecture to improve scalability and user experience.
- Built RESTful APIs, WebSocket-powered live price tracking, portfolio management, and interactive watchlist visualizations using Highcharts.
- Deployed the application on Google Cloud Platform and extended it to iOS using Swift, enabling scalable, cross-platform access.

Personality Prediction using Deep Learning **September 2022 – April 2023**

- Developed and compared BERT-, ELMo-, and ULMFiT-based models to predict Big Five personality traits from user-generated text.
- Built an end-to-end NLP application spanning data preprocessing, feature extraction, model evaluation using F1 and ROC-AUC, and a user-facing interface for generating predictions.

HACKATHONS AND AWARDS

- **First Place at the Crescendo Hackathon 2023:** Built a waste-recognition and disposal-tracking application to promote environmental sustainability.
- **Best All-Rounder Award at Fr. CRCE:** Recognized for excellence across academics, leadership, and extracurricular involvement.

LEADERSHIP AND COMMUNITY

- **Graduate Co-Chair, Student E-Board USC Catholic Caruso Center (2024–2025):** Led graduate student engagement initiatives, coordinated community events, and supported leadership-development programming.
- **Management and Data Science Lead, Hawki Cybersecurity Community (2022–2023):** Led data science initiatives supporting cybersecurity analysis and organized the Fr. CRCE Cybersecurity Conference across multidisciplinary teams.

SKILLS

- **Product Management:** Product discovery, requirements definition, user and market analysis, competitive analysis, business case development, product positioning, roadmapping, feature prioritization, KPIs, experiment design and A/B testing, launch readiness, Agile, cross-functional stakeholder management
- **Data and AI:** Python, SQL, PostgreSQL, Pandas, Excel, Power Query, ETL, regression, hypothesis testing, survey analytics, Natural Language Processing (NLP), deep learning, LLMs, prompt engineering, retrieval-augmented generation (RAG), TensorFlow, scikit-learn
- **Design, Engineering, and Tools:** Power BI, Tableau, Google Analytics, Knowi, Figma, prototyping, RESTful APIs, WebSockets, React, Node.js, MongoDB, GCP, AWS, Git, Jira
